

Junior Web Developer

Junior Web Developer

The Company

Smart software for creative people.

Foundry is not just a technology maker or a software seller; we are here to empower artists and designers across the world by enhancing their creative potential. We seek to create a world where people can continually raise their creative potential and to champion creative people by developing tools, technologies and processes that empower them to bring their ideas to life, more quickly and effectively.

We believe in:

- Constantly challenging
- Always being approachable
- Committed partners
- Endless enthusiasm!

Our technology portfolio is as creative as it is technical, packed full of ground-breaking, award-winning techy goodness that will have even the most demanding organization salivating!

We are a little bit proud of what we achieve at Foundry and want to take you on our journey with us.

The Role

You will work within the full life cycle of website/web application design and development and be responsible for Front End web development with HTML & CSS and Server Side programming with PHP and MySQL. You will play a key role in the development of our website(s) and web based applications utilising PHP, HTML, CSS and Drupal. You will gain experience with Frameworks such as Laravel/Silex/Symfony.

The role will give you exposure to working on a full Drupal CMS driven website including Ecommerce and various bespoke online business systems along with marketing content, templates and everything in-between.

The successful Web developer will work closely with the development team throughout the full development life cycle in a highly collaborative and enjoyable working environment. The successful candidate will have the opportunity to work on high quality web applications, CMS extensions and developing content. You will have a passion for developing great work and the discipline and time management needed to work on your own initiative as you may be asked to take the technical lead on some projects. You will be a confident communicator as you will need to convey ideas to individuals with little understanding of development and liaise with teams and staff to pre-empt potential issues and implement changes.

Junior Web Developer

The Responsibilities

- Some commercial PHP development experience.
- Good noncommercial PHP programming experience would also be considered.
- HTML, CSS (MySQL desirable).
- Passion for technology and PHP development, hand coding skills essential
- Knowledge of E-Commerce functions
- Experience and understanding of CMS Platforms (Drupal, Joomla, Wordpress)
- Understanding of MVC Frameworks and Frameworks in general desirable
- Ability to code software according to standards and design guidelines.
- Knowledge of testing practices and techniques (including PHPUnit and Behat) desirable
- Excellent English communication skills.

Key Accountabilities

- Web and application development.
- Online asset development.
- Bug tracking and version control.
- Producing quality coded solutions from design specifications.

Applying

If you meet the criteria, are eligible to work and are interested, please send your covering letter, CV, salary expectations and notice period to jobs@foundry.com with the subject "Junior Web Developer".

More About Us

Foundry designs creative software technologies used to deliver remarkable visual effects and 3D content for the design, visualisation and entertainment industries. Foundry's software advances the art and technology of visual experience in partnership with creative leaders across the globe. It enables clients like Pixar, Mercedes-Benz, Google, ILM, Weta Digital, Blizzard, The Moving Picture Company and Sony Pictures Imageworks to turn incredible ideas into reality by solving complex creative challenges.

The company was founded in 1996 and is headquartered in London, with 300 staff based across offices in Silicon Valley, Los Angeles, Shanghai, Austin and the UK. Foundry consistently invests in R&D to provide more efficient ways for its clients to bring visual concepts to life.

In 2015, the London Stock Exchange named Foundry one of its "1000 Companies to Inspire Britain." It regularly features in The Sunday Times' Tech Track as one of Britain's fastest-growing private technology companies, most recently in 2016 when it also won the Excellence in Service Award at the International Track 200 awards. Every single film nominated for the Academy Award for Best Visual Effects in the last five years was made using Foundry's software.

The company was acquired by HgCapital in 2015.
